PROJECT WORK

- **Students' Management System**   **Oct 2023 - Present**

  The Student Management System is a web-based application crafted with HTML, CSS, JavaScript, Bootstrap, and PHP. This tool simplifies administrative tasks in educational institutions, offering efficient student registration, attendance tracking, results management, and notices updation. With a responsive design, it ensures accessibility on any device, making it an ideal solution for seamless student data management.

- **Online Gas Distribution System**   **Jan 2022 - Aug 2023**

  The Gas Distribution System Web Application is a modern, user-friendly platform built using HTML, CSS, JavaScript, Bootstrap, and PHP. This system is designed to streamline and enhance the management of gas distribution networks. Users can log in, monitor gas supply, place orders, and track deliveries, improving efficiency and customer satisfaction. This project brings a digital transformation to gas distribution, making it more accessible and convenient for both providers and consumers.

- **Car Rental System**   **July 2020 - Jan 2022**

  The Car Rental System is a web application utilizing HTML, CSS, JavaScript, Bootstrap, and PHP. This project aims to create a user-friendly web-based car rental system that leverages a stack of web technologies, including HTML, CSS, JavaScript, Bootstrap, and PHP. The system will allow users to browse, select, and rent cars online, providing an efficient and convenient way to manage car rentals.
